

If you are considering extending or modernising your home, ATK Building Contractors specialise in extensions, renovations, alterations, and attic conversions.

Our experience ranges from the smallest internal changes, to full scale attic conversions and home extensions. We work closely with our customer and help them to develop out their ideas into a reality. We will work alongside the customers engineers and architects to ensure that we create exactly what the customer is looking for. All projects we take on will be completed end to end, including all plumbing, electrical, plastering etc. Typical building developments we can support are:

- Complete attic conversions
- Velux window installation
- Home extensions
- Home renovations
- Home modifications, including:
 - Home layout modifications - moving walls, adding new walls etc...
 - Re-plumbing a property
 - Re-wiring a property

ATK Building Contractors will advise their customers as to whether their home modifications will require a planning application, or not.
