

ATK Building Contractors have almost 30 years experience of complete house builds. We have experience from small 3 bedroom builds to large private properties.

We pride ourselves on our high level of customer support, and will work with the customer and their engineers and architects to help you plan your dream home. We will take your plans and build your property from the very initial groundwork all the way to final completion. All aspects of the job are looked after, including plumbing, electrical, carpentry etc... We specialise in all house finishes including tiled or slate roofs, brick or plaster finish and PVC or timber windows.

With energy becoming a hot topic recently, ATK Building Contractors are ready to meet your heating and insulation requirements. We specialise in geothermal heating systems, along with the more conventional oil and gas heating systems. We also pride ourselves on our recent but extensive experience with underfloor heating, and all types of insulation.

ATK Building Contractors have experience with both timber frame and block built properties.
